Corrigendum

Corrigendum to ‘Monitoring commercially available complementary foods for the infant and young child in Southeast Asia: accountability and the way forward’ [Am J of Clin Nutr Am J Clin Nutr 120 (2024) 281–282]

The author regrets the error in the following statement:  
“According to the authors, the CPCF food labels were sampled for the survey if they were in the English language which limited CPCF sampling in Vietnam as many product labels were not in English.”

Which should be corrected as follows:

“According to the authors, the CPCF food labels were sampled for the survey if they were in the English language or the local language, which led to excluding 215 of 457 products from Vietnam for being in the non-study language.”

The author apologizes for any inconvenience caused.
