Dear Prof Pei,

We have received the submission entitled: "TREM-1 modulation produces positive outcome on the histopathology and cytokines release profile of Plasmodium berghei –infected mice" for possible publication in Journal of Parasitic Diseases, and you are listed as one of the co-authors.

The manuscript has been submitted to the journal by Dr. Dr Rusliza Basir who will be able to track the status of the paper through his/her login.

If you have any objections, please contact the editorial office as soon as possible. If we do not hear back from you, we will assume you agree with your co-authorship.

Thank you very much.

With kind regards,

Springer Journals Editorial Office

Recipients of this email are registered users for this journal. In line with data privacy directives, we will remove your personal information from the journal’s database upon your request. Where the journal's database is shared with companion journals, this will be all-inclusive. Database sharing is indicated at the journal's homepage. At removal, your personal identifiers are hashed and your account is deactivated. We will be unable to reinstate your account history. The history of past manuscript progress is retained scholarly record, and may only be retrieved post-archiving, for official investigation, in line with COPE practices. Once your account is removed, you are no longer known to the journal. As such, it will be possible for journal Editors to re-register you anew, if your contact details and expertise are found in the public record. You will always be notified of a (re)registration, prior to invitation to participate. If you prefer that the journal persistently recalls your wish to not be contacted for invitations to participate, please indicate this. This may be accommodated as a service provision, but necessitates that we maintain a record of your registration details and preference for no-contact. Publication office:
