LIFE IN THE FIVE-FOOT WAYS OF  
DOWNTOWN KUALA LUMPUR

KAKI LIMA STORIES | FIVE-FOOT WAYS

The Kaki Lima is a delightful little book that unfolds the urban aesthetics of the five-foot way that is a common typology to Asian cities. With urbanization, the five-foot way has undergone many changes and challenges, leading to a series of spatial outcomes that add vibrancy particularly to the Kuala Lumpur urban condition. This book provides a curated set of drawings and mappings of five-foot ways, in narrating these urban qualities.
