OUTLINE

14.1 Introduction: Complexation in Pharmaceutical Products 474
  14.1.1 Types of Complexation 475
  14.1.2 Application of Complexation 479

14.2 Fundamental Methods of Formation of Drug Complexes 480
  14.2.1 Physical Blending Method 480
  14.2.2 Kneading Method 481
  14.2.3 Coprecipitation Technique 481
  14.2.4 Solution/Solvent Evaporation Method 481
  14.2.5 Neutralization Precipitation Method 483

  14.2.6 Milling/Cogrinding Technique 483
  14.2.7 Atomization/Spray Drying Technique 483
  14.2.8 Lyophilization-Freeze Drying Technique 483
  14.2.9 Microwave Irradiation Method 484
  14.2.10 Supercritical Antisolvent Technique 484
  14.2.11 Extrusion 485

14.3 Characterization of Drug Complexation 485

Dosage Form Design Considerations
